DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 9, 12-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 9 is rejected because claim 9 cannot claim the compound of formula (I) because claim 1 from which the claim depends on is drawn to a non-aqueous electrolyte not a compound.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3, 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Yoshimitsu et al. (4,888,255).

Yoshimitsu et al. teaches a non-aqueous electrochemical cell comprising an anode containing an alkali metal, a cathode and an electrolyte comprising an aromatic compound. Yoshimitsu et al. teaches in column 5, lines 14-25, that the amount of the aromatic compound in the electrolyte is between 1×10^{-6} and 1×10^{-2} mol/l. Yoshimitsu et

al. teaches in column 7, Example 2, that dibenzothiophene (7×10^{-4} mol/l was used) $[x=S,$
 $Y = a \text{ single bond}, R1-R8 = \text{hydrogen atoms}]$.

Allowable Subject Matter

4. Claims 4-5, ~~7~~-8, 10-11, 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
